

ARYAN

+91 9389532710 | aryan411770@gmail.com | linkedin.com/in/aryan | github.com/Aryan-404-404 | [Portfolio](#)

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, SQL

Frontend: React.js (Hooks, Context API, React Router), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, Middleware (CORS, Cookie-Parser)

Databases: MongoDB (Mongoose, Atlas, Indexing, TTL Indexes)

AI/ML: Groq API (Llama 3.3 70B), Gemini API, Prompt Engineering

Tools and Deployment: Git, GitHub, Postman, Docker, Vercel, Render, VS Code

Libraries: Recharts, Axios, PDF.js, Web Workers, JWT, BCrypt, RBAC, Octokit, Commander

EDUCATION

DIT University, Dehradun, Uttarakhand

Expected July 2026

Bachelor of Computer Applications (BCA) | CGPA: 8.60 / 10

Coursework: Data Structures and Algorithms, DBMS, OOP, Operating Systems, Full-Stack Development, Cloud Computing

EXPERIENCE

Frontend Developer Intern | *The Tann Mann Gaadi* | Remote

Feb 2025 – Present

- Built production-ready UI components for an admin panel using React.js and Tailwind CSS, translating Figma designs with pixel-level accuracy.
- Developed fully responsive pages with dynamic data rendering and resolved UI bugs across multiple dashboard views.
- Followed feature branch and PR workflow with conventional commits; wrote integration-ready, zero-hardcoded-data components.

PROJECTS

RepoCLI — Terminal AI Agent | *Node.js, TypeScript, Groq SDK, Octokit, Commander* | [npm](#) | [Demo Vid](#) | [GitHub](#)

- Published npm CLI tool that accepts plain English commands and executes real developer tasks via an agentic tool-calling loop — file ops, shell commands, and GitHub API.
- Built multi-tool agent architecture with Groq Llama 3.3 70B: agent iterates over tool results until task completion, not a single-shot LLM call.
- Implemented recursive DFS file search for codebase-wide context; safety guardrails prompt confirmation before destructive shell commands.

JobFlow-AI Chrome Extension | *MERN, JWT, Chrome Extension API* | [Demo](#) | [GitHub](#)

- Built a full-stack job tracking platform with JWT auth and AI-powered resume insights via Groq Llama 3.3 70B.
- Developed a Chrome extension for JD-resume matching, automated job data extraction, one-click dashboard sync, and cold email generation.
- Implemented AI-driven form pre-filling extracting company, role, location, and job type from postings with 95%+ accuracy.

AI-Powered Expense Tracker | *MERN, Groq API, MongoDB, JWT, Recharts* | [Live](#) | [GitHub](#)

- Developed a full-stack financial platform using MVC architecture with 8+ RESTful API endpoints and JWT and BCrypt authentication.
- Integrated Groq Llama 3.3 70B chatbot with MongoDB conversation memory using TTL indexes, reducing generic responses by 85%.
- Built Recharts dashboards with PDF export; optimized MongoDB queries improving response times by 60%.

CERTIFICATIONS AND ACHIEVEMENTS

LeetCode: 240+ problems solved | Contest Rating: 1,632 | Global Rank: Top 19.26%

Frontend Developer (React) — HackerRank (Jan 2026)

SQL (Intermediate) — HackerRank (Jan 2026)

ADDITIONAL INFORMATION

Soft Skills: Problem-Solving, Analytical Thinking, Team Collaboration, Agile Development

Languages: English, Hindi (Native)
